

# Stand Alone and In-line Pallet Dispensers

# Enhance Safety, Efficiency, and Ergonomics in your operations

High-quality pallet dispensers ensures optimal and consistent pallet handling, while promoting workplace safety and employee satisfaction.

These dispensers

- minimize heavy lifting
- improve ergonomics
- allow efficient, uniform pallet management

Operators can easily handle pallets without needing a forklift or stacker certificate, making these machines accessible to all employees.

All models feature automatic operation with simple in/out pallet selection and can also be operated manually if needed.

Built with robust construction and advanced technology, our dispensers are designed to meet the needs of companies prioritizing both **safety and efficiency.**

# Stand Alone Pallet Dispenser Models

Each model is custom-built, with a standard lead time of 10 weeks.

# AutoStack Basic Pallet Dispenser

Fully Automatic Pallet Stacking and Destacking

The AutoStack Basic is a fully automatic pallet dispenser designed for safe and ergonomic pallet handling.

It receiving and dispenses pallets one at a time, eliminating manual lifting.

UNLIMITED INNOVATION

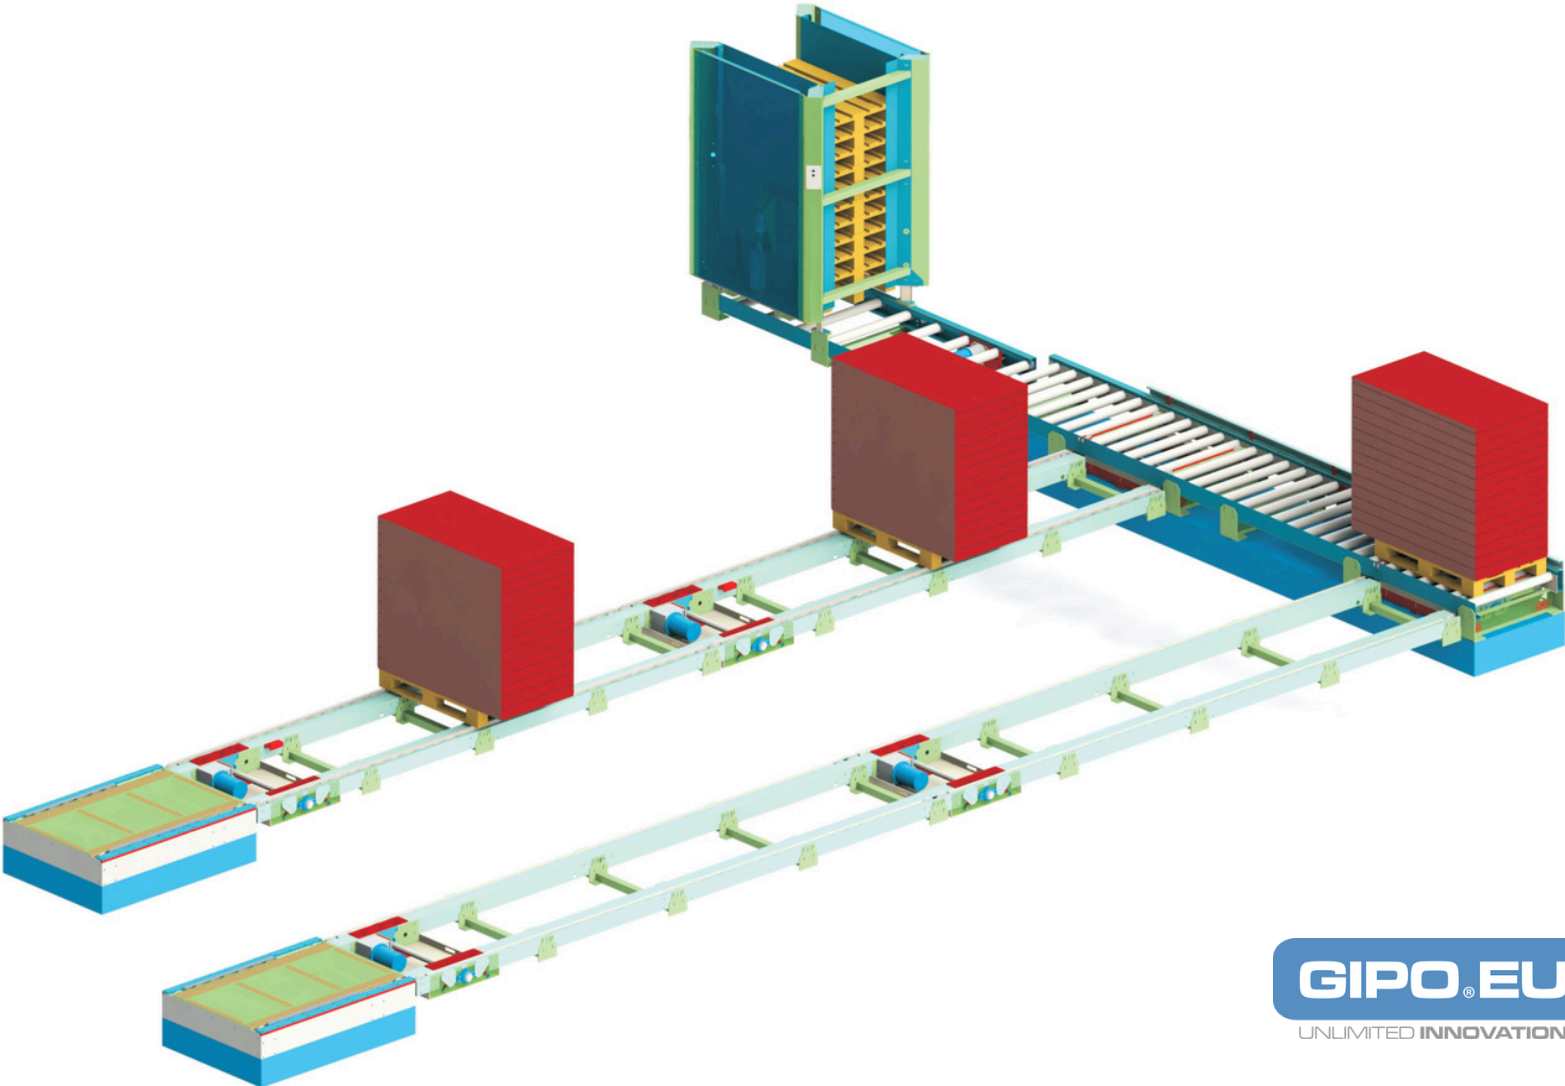

A wide-angle, high-angle photograph of a large industrial factory floor. The space is filled with various pieces of machinery, workbenches, and equipment. Several workers in dark clothing are visible, engaged in tasks. The ceiling is high with a complex network of steel beams and lighting fixtures. The overall atmosphere is one of a busy, modern manufacturing environment.
